### Characteristics

Standard lip ring

### Application area

Injected molded sewer trap made of PVC-U designed for connections to piping systems conform to EN1329 and EN1401.

Redi trap interceptor has the following technical features:

- No hand welding
- SC or RR jointing type
- Optimal water seal (min. 3/10 diameter ratio) to prevent the passage of sewer gas
- Provided with 2 rodding access screw caps
- Blank vents inlets for the relief of sewer gases

Supplier's Quality system has to be ISO 9001:2008 certified, supplier's Environment system has to be ISO 14001:2004 certified as a condition for purchase.
