

Dry condensate trap (for aC units or heating pumps)

Codice	DN (mm)
199CLPP	20-26-30

Characteristics

Traps were conceived to eliminate bad smells produced in the condensate discharge hose, one of the major problems tied with recessed housings for air-conditioning units. Many traps are fitted and embedded into the wall without any possibility for the user to inspect them at a later stage. The cover guarantees an easy access to remove any likely obstruction (i.e. bugs or algae). Thanks to its manufacturing process on a transparent material, an immediate vision of the good installation operation can be achieved. Fast inspection.

Notes

Kit: gaskets, adaptor, sealing rings, inspection cap, hole saw
