SICURFLEX® Gas

EN 14800
CE

Tubo flessibile di acciaio inossidabile a parete continua per allacciamento di apparecchi a gas per uso domestico e similari alimentati a gas manifatturati, naturali e gpl per installazione in ambiente interno ed esterno.

Stainless steel flexible gas hose with seamless walls for the connection of domestic gas appliances etc. that use manufactured, natural and LPG gas; for both indoor and outdoor installation.

TIPO 1 / TYPE 1

Tubo altamente flessibile fabbricato con parete continua a onde parallele in Acciaio Inox AISI 304L. Treccia in acciaio inossidabile, saldata ai raccordi terminali, per rinforzare e consentire la resistenza alla trazione del tubo. Guaina liscia in materiale plastico trasparente per la protezione contro le aggressioni esterne. Anelli metallici di fissaggio della guaina plastica ai raccordi terminali del tubo. Raccordi con filettatura maschio in Acciaio Inox AISI 304 e dado femmina realizzato in ottone nichelato. Guarnizione in gomma NBR.

A highly flexible gas hose with seamless walls and AISI 304L stainless steel parallel corrugated armouring. The hose has a stainless steel braided armouring welded to the end fitting to reinforce the hose and to give the hose the necessary resistance to traction. The smooth outer cover is made of transparent plastic to protect the hose from environmental and other outside influences. Metal connecting rings on the metal and fittings of the smooth outer cover. Fittings with male thread in AISI 304 stainless steel and female nut in nickel-plated brass. Seal in NBR rubber.
